Section I. Ion Accelerators and Equipment

The feasibility of high power cyclotrons
Th. Stammbach, S. Adam, H.R. Fitze, W. Joho, M. Märki, M. Olivo, L. Rezzonico, P. Sigg and U. Schryber 1
Large area ion and plasma beam sources
J. Waldorf 8
A new injector for the ISL-cyclotron at HMI
O. Engels, J. Häuser, H. Homeyer, F. Marhauser, W. Pelzer and A. Schempp 16
Technique for fluence attenuation by acceleration of decay particles
T. Itahashi, M. Kondo and T. Yamagata 21
The cooler synchrotron COSY in Jülich
U. Bechstedt, J. Dietrich, R. Maier, S. Martin, D. Prasuhn, A. Schnase, H. Schneider, H. Stockhorst and R. Tölle 26
Ar^+-beam experiments with the high-current heavy-ion Spiral-RFQ at GSI
U. Bessler, A. Schempp, H. Deitinghoff, A. Kipper, J. Klabunde, T. Sieber and P. Spädtke 30
The Frankfurt ECRIS-RFQ facility for materials research with highly charged ions
K. Stiebing, H. Streitz, L. Schmidt, A. Schremmer, K. Bethge, H. Schmidt-Böcking, A. Schempp, U. Bessler, P. Beller and J. Madlung 34
Design of low frequency RFQ accelerators for ion implantation
H. Vormann, U. Beisel, O. Engels, D. Li and A. Schempp 38
Study on a tuning-free network for the rf accelerating cavity
K. Sato, T. Rizawa, T. Saito, H. Tamura, M. Uraki, M. Yamamoto, Y. Morii, K. Hosono, K. Hatanaka, T. Itahashi, K. Takahisa, K. Tamura and I. Miura 42
Development of heavy ion IHQ linac for material irradiation
T. Ito, S. Yamaki, M. Okamura, K. Sasa, H. Schubert and T. Hattori 46
Energy widths of ion beams from a tandem accelerator
B. Hartmann, S. Kalbitzer and Ch. Klatt 50
The Proton Irradiation Facility at the Paul Scherrer Institute
W. Hajdas, L. Adams, B. Nickson and A. Zehnder 54
Ion irradiation facility for materials research at the 1.4 MeV/u high-charge state injector of GSI
K. Tinschert, D.M. Rück, H. Emig, K. Leible and N. Angert 59
Concept and status of the new sample preparation and analyzing facility at Bochum
S. Kubsky, L. Borucki, M. Berheide, S. Baier, H.-W. Becker, F. Gorris, C. Grunwald, T. Gutt, G. Krüger, M. Mehrhoff, N. Piel, W.H. Schulte and C. Rolfs 63
Fine-focusing system of intense beams for application of ion-induced plasma
K. Sasa, Y. Oguri, M. Okamura, M. Okada, T. Ito, N. Hayashizaki and T. Hattori 67
Computer simulation for electrostatic lenses by using piecewise polynomials
L. Kiss 71

0168-583X/96/$15.00 © 1996 Elsevier Science B.V. All rights reserved

Low-energy ion source characteristics for producing an ultra-fine microbeam
Y. Ishii, R. Tanaka and A. Isoya 75
Beam-current measurement based on residual gas ionization
W. Bohne, S. Hessler and G. Röschert 78

Section II. Electron Accelerators and Equipment

Review of industrial applications of electron accelerators
R. Mehnert 81
Focused high-voltage electron beams in material science
W. Sigle 88
Custom-tailored dose with the IMPELA electron irradiator
N.H. Drewell, S. Sandri, S.T. Craig, Frketich and D.L. Smyth 93
The measurement, control, and validation of critical parameters in an electron beam sterilization facility
P. Burns, N.H. Drewell and J. McKeown 96
Preliminary research concerning the use of electron accelerators to improve the conservability and to extend the shelf-life of fruits and vegetables
R. Minea, C. Oproiu, S. Pascanu, C. Matei and O. Ferdes 99
Electron beam technology for improvement of the recovery characteristics of power thyristors
E. Iliescu and V. Banu 103
IAP linacs in applied research
D. Martin, M. Dragusin, A. Radu, C. Oproiu, M. Radoiu, G. Cojocaru and S. Marghitu 106
Excimer lasers induced electron beams on metal cathodes under a plasma effect
A. Beloglazov, M. Martino and V. Nassisi 110
Computer aided simulations of high current small energy electron beam channels
S. Marghitu, D. Martin, C. Oproiu, O. Marghitu and R. Cramariuc 114
Improving beam profiles in the Super-ALIS super conducting storage ring
K. Yamada, T. Kaneko, K. Kuroda, M. Nakajima and T. Hosokawa 119

Section III. Synchrotron Radiation and X-ray Devices

X-ray microprobes
P. Chevallier, P. Dhez, A. Erko, A. Firsov, F. Legrand and P. Populus. 122
Accelerator based X-ray facilities applied to freight control
G. Gaillard 128
Compact flash X-ray sources and their applications
J.M. Pouvesle, C. Cachoncinlle, R. Viladrosa, E. Robert and A. Khacef 134
X-ray detectors with digitized preamplifiers
J. Stein, F. Scheuer, W. Gast and A. Georgiev 141
Improvement of heavy element tomography results using tunable gamma-ray beams
M. Bertschy, J. Jolie and W. Mondelaers 146
Direct measurement and Monte Carlo simulation of a bremsstrahlung source created by 10 MeV electrons
N. Stritt, M. Bertschy, J. Jolie and W. Mondelaers. 150

Section IV. Ion Beam Modification of Materials

Ion beam modification for submicron technology
S. Kalbitzer, Ch. Wilbertz, Th. Miller and A. Knoblauch 154
Application of ion implantation in tooling industry
C.A. Straede 161

Depth resolving phase analysis of ion implanted stainless steel
G. Walter, R. Heitzmann, D.M. Rück, B. Stahl, R. Gellert, O. Geiss, G. Klingelhöfer and E. Kankeleit 167

Application of nuclear analytical and electron microscopic techniques to the investigation of the oxidation behavior of Mg-implanted steel samples
F. Noli, P. Misaelides, G. Giorginis, H. Baumann and R. Hausner 171

Aluminum ion implantation under backfilling oxygen
R.M. Hausner, H. Baumann and K. Bethge 176

Diffusion phenomena of implanted nitrogen in chromium
I. Symietz, H. Baumann and K. Bethge 182

Ion beam mixing at copper/alumina interfaces using marker geometry
K. Neubeck, H. Hahn, A.G. Balogh, R. Hausner, H. Baumann, K. Bethge and D.M. Rück 186

Effect of Cr implantation on the morphology of Al:Si films
M. Zaborowski, G. Gawlik, A. Barcz and A. Turos 191

Crystallographic structure of δ-TiN films prepared by photon and ion beam assisted deposition
H. Wengenmair, J.W. Gerlach, U. Preckwinkel, B. Stritzker and B. Rauschenbach 196

A study on the metallisation and stabilisation of porous silicon
T. Giaddui, L.G. Earwaker, K.S. Forcey, B.J. Aylett and I.S. Harding 201

Low energy ion beam irradiation of silicon
P.W. Nebiker, M. Döbeli, R. Mühle, M. Suter and D. Vetterli 205

Defect development and dopant location due to elevated temperature implantation of InP with MeV zinc ions
H. Krause, R.-H. Flagmeyer, J. Vogt, A. Kling and T. Butz 209

Epitaxial crystallization and nucleation during MeV-ion beam processing of amorphous GaAs surface layers
T. Bachmann, E. Glaser, R. Schulz, U. Kaiser and G. Sáfrán 214

Light ion induced damage in CdTe and $Hg(1-x)Cd(x)Te$ epitaxial thin films
S.P. Russo, P.N. Johnston, R.G. Elliman and D.N. Jamieson 218

Depth profile analysis and study of the electronic properties of silicon nitride layers produced by ion implantation
A. Markwitz, M. Arps, H. Baumann, E.F. Krimmel and K. Bethge 223

Microstructural characterization of stoichiometric buried Si_3N_4 films
E.C. Paloura, A. Ginoudi, A. Markwitz, Ch. Lioutas, M. Katsikini, K. Bethge, S. Aminpirooz, H. Rossner, E. Holub-Krappe, T. Zorba and D. Siapkas 227

The effect of ion implantation in the microstructure of Si_3N_4 films: an X-ray absorption study
E.C. Paloura, A. Mertens and K. Holldack 231

Low-energy 15N implantation in carbon for the synthesis of carbon nitride layers
F. Link, H. Baumann, A. Markwitz, E.F. Krimmel and K. Bethge 235

Damage production and annealing of ion implanted silicon carbide
A. Heft, E. Wendler, J. Heindl, T. Bachmann, E. Glaser, H.P. Strunk and W. Wesch 239

Damage and sputtering of fullerene by low energy medium and heavy ions
D. Fink, L.T. Chadderton, J. Vacik, V. Hnatowicz, F.C. Zawislak, M. Behar and P.L. Grande 244

Influence of pulsed laser annealing on rare earth implanted luminescence
N. Can, P.D. Townsend, D.E. Hole, J.M. Ballesteros, C.N. Afonso and H.V. Snelling 248

An IBA and Raman study of irradiated thin films of $YBa_2Cu_3O_7$ superconductor
R. Vlastou, E.N. Gazis, C.T. Papadopoulos, E. Liarokapis, D. Palles, S. Kossionides, M. Kokkoris, M. Pilakouta, W. Assmann and H. Huber 253

Electrical conduction in ion implanted Nylon-6 films
V. Balasubramanian, D.S. Kelkar and M.B. Kurup 257

Radiation damage in spinel single crystals
A. Turos, Hj. Matzke, A. Drigo, A. Sambo and R. Falcone 261

Influence of plasma density and plasma sheath dynamics on the ion implantation by plasma immersion technique
H. Bender, J. Brutscher, W. Ensinger, R. Günzel, J. Halder, H. Klein, B. Rauschenbach, J. Schäfer, B. Seiler and R. Thomae 266

Section V. Backscattering and Recoil Analysis

RBS with monolayer resolution
K. Kimura and M.-h. Mannami 270
Elemental concentration profile in ancient gold artifacts by ion beam scattering
J.L. Ruvalcaba-Sil and G. Demortier 275
RBS characterization of iridium silicides formed by RTA in vacuum
T. Rodríguez, A. Almendra, M.F. da Silva, J.C. Soares, H. Wolters, A. Rodríguez and J. Sanz-Maudes. 279
Alpha backscattering used in stoichiometry determination of thin SiC coatings on Si(100) wafers
R. Somatri, J.F. Chailan, A. Chevarier, N. Chevarier, G. Ferro, Y. Monteil, H. Vincent and J. Bouix . 284
Density of thin TiO_2 films
M. Laube, F. Rauch, C. Ottermann, O. Anderson and K. Bange. 288
Study of structural differences between stoichiometric and congruent lithium niobate
A. Kling, J.G. Marques, J.G. Correia, M.F. da Silva, E. Diéguez, F. Agulló-López and J.C. Soares . . 293
Investigation of chemical processes at mineral surfaces using accelerator-based and surface analytical techniques: heavy metal sorption on zeolite crystals
P. Misaelides, A. Godelitsas, S. Kossionidis and G. Manos 296
BSCAT: Code for simulation and for analysis of the RBS/NRA spectra
B. Rajchel. 300
ERDA of solar selective absorbers
W. Assmann, Th. Reichelt, T. Eisenhammer, H. Huber, A. Mahr, H. Schellinger and R. Wohlgemuth. 303
Elastic recoil detection (ERD) with extremely heavy ions
J.S. Forster, P.J. Currie, J.A. Davies, R. Siegele, S.G. Wallace and D. Zelenitsky 308
Damage in semiconductor materials during heavy-ion elastic recoil detection analysis
S.R. Walker, P.N. Johnston, I.F. Bubb, W.B. Stannard, D.N. Jamieson, S.P. Dooley, D.D. Cohen, N. Dytlewski and J.W. Martin. 312

Section VI. Microprobes and Particle Induced X-ray Emission

From micro- to nanoprobes: auspices and horizons
T. Butz and G.J.F. Legge. 317
Nuclear microprobe design
P.H.A. Mutsaers 323
Applications of nuclear microprobes in the semiconductor industry
M. Takai. 330
Applications of nuclear microprobes in environmental research
K.G. Malmqvist 336
Ion beam studies of archaeological gold jewellery items
G. Demortier 347
Further results from PIXE analysis of inks in Galileo's notes on motion
P. Del Carmine, L. Giuntini, W. Hooper, F. Lucarelli and P.A. Mandò 354
Aerosol study in the town of Genova with a PIXE analysis
P. Formenti, P. Prati, A. Zucchiatti, F. Lucarelli and P.A. Mandò. 359
X-ray emission spectroscopy applied for bulk and individual analysis of airborne particulates
V. Valkovic, M. Dargie, M. Jaksic, A. Markowicz, A. Tajani and O. Valkovic. 363
PIGE–PIXE analysis of chewing sticks of pharmacological importance
S.O. Olabanji, O.V. Makanju, A.M.I. Haque, M.C. Buoso, D. Ceccato, R. Cherubini and G. Moschini 368

Glancing incident MeV ion beams for total reflection PIXE (TPIXE) and RBS surface analysis
J.A. van Kan and R.D. Vis 373
Testing of radiation detectors by IBIC imaging
M. Jakšić, I. Bogdanović, M. Bogovac, S. Fazinić, S. Galassini, K. Kovačević, C. Manfredotti and E. Vittone 378
Scanning transmission ion microscopy (STIM) with a 3 MeV proton cyclotron beam
I.F. van Maanen, P.H.A. Mutsaers, B.A.W. Verhoef and M.J.A. de Voigt 382
Investigation of the resolution affecting parameters of a nuclear microprobe using a solenoid lens
A. Stephan, J. Meijer, J. Adamczewski, H. Röcken, D. Löffelmacher, H.H. Bukow and C. Rolfs 387
Determination of the microbeam profile using deconvolution procedures
B. Maj, P.H.A. Mutsaers, E. Rokita and M.J.A. de Voigt 391

Section VII. Nuclear Reactions and Activation Analysis

Cross section of the $^{14}N(\alpha,P_0)^{17}O$ nuclear reaction for analytical applications
G. Giorginis, P. Misaelides, A. Crametz and M. Conti 396
Cross section of the $^{32}S(\alpha, p)^{35}Cl$ nuclear reaction for sulphur determination
M. Soltani-Farshi, J.D. Meyer, P. Misaelides and K. Bethge 399
Boron localisation in silicon, an application of nuclear reaction channelling for materials analysis
M. Vollmer, J.D. Meyer, R.W. Michelmann and K. Bethge 403
A computer controlled PIGE setup for the analysis of thin samples
D. Strivay, H.P. Garnir and G. Weber 407
Quantification of fluorine in SiF_x etch residues on silicon with proton induced γ-emission
L.J. van IJzendoorn, M. Haverlag, A. Verbeek, J. Politiek and M.J.A. de Voigt 411
Thin layer activation of non-metallic materials by using nuclear implantation
F. Ditrói and I. Mahunka 415
Ion beam-based studies for tribological phenomena
P.M. Racolta, L. Popa-Simil and B. Alexandreanu 420
Excitation function of alpha-particle induced nuclear reactions on natural nickel
S. Takács, F. Tárkányi and Z. Kovács 424
Production of residual nuclei from irradiation of thin Pb-targets with protons up to 1.6 GeV
M. Gloris, R. Michel, U. Herpers, F. Sudbrock and D. Filges 429

Section VIII. Accelerator Mass Spectrometry

Production of cosmogenic nuclides in meteoroids: accelerator experiments and model calculations to decipher the cosmic ray record in extraterrestrial matter
R. Michel, I. Leya and L. Borges 434
Detection of ^{236}U: a possible 100-million year neutron flux integrator
K.H. Purser, L.R. Kilius, A.E. Litherland and X. Zhao 445
^{41}Ca measurements at the Zurich AMS facility
B. Dittrich-Hannen, F. Ames, M. Suter, M.J.M. Wagner, Ch. Schnabel, R. Michel, U. Herpers and E. Günther 453
High-precision radiocarbon measurements at the ANTARES AMS Centre
M.A.C. Hotchkis, D. Fink, Q. Hua, G.E. Jacobsen, E.M. Lawson, A.M. Smith and C. Tuniz 457
A high capacity ion source for AMS
W.E. Kieser, A.E. Litherland, X.-L. Zhao, L.R. Kilius and R.P. Beukens 461
The Groningen AMS facility
S. Wijma, A.T. Aerts, J. van der Plicht and A. Zondervan 465
Cross section measurements of proton induced reactions using a gas target
Y. Parrat, W. Hajdas, U. Baltensperger, H.-A. Synal, P.W. Kubik, M. Suter and H.W. Gäggeler 470

Environmental levels of carbon-14 around a Swedish nuclear power plant measured with accelerator mass spectrometry
K. Stenström, B. Erlandsson, R. Hellborg, A. Wiebert and G. Skog 474
AMS ^{14}C dating of ancient human bones in missing layers
Y. Sixun, G. Zhiyu, W. Jianjun, G. Shijun, L. Kun, L. Kexin, L. Xiangyang and L. Bin 477
Medical application of ^{26}Al
C. Steinhausen, P. Gerisch, B. Heisinger, Ch. Hohl, G. Kislinger, G. Korschinek, M. Niedermayer, E. Nolte, M. Dumitru, M. Alvarez-Brückmann, M. Schneider and T.H. Ittel 479
On the production of 36Cl by high energy protons in thin and thick targets
Th. Schiekel, F. Sudbrock, U. Herpers, M. Gloris, I. Leya, R. Michel, H.-A. Synal and M. Suter 484
Increase of ^{129}I in the environment
M.J.M. Wagner, B. Dittrich-Hannen, H.-A. Synal, M. Suter and U. Schotterer 490

Section IX. Miscellaneous Techniques

Nuclear waste transmutation
S. Leray 495
Radioactive ion beams for solid state research
J.G. Correia 501
Perturbed angular correlations in metal oxides with radioactive tracer beams
D. Lupascu, M. Neubauer, T. Wenzel, M. Uhrmacher and K.P. Lieb 507
Biomedical applications of hadron accelerators
U. Amaldi and M. Silari 513
The proton therapy system for the NPTC: equipment description and progress report
Y. Jongen, S. Laycock, M. Abs, J.-C. Amelia, W. Beeckman, W. Kleeven, M. Ladeuze, G. Lannoye, D. Leyman, V. Poreye, D. Vandeplassche, S. Zaremba, T. Hurn, L. Nissley, E. Hubbard, M. Heiberger, M. Tabor, C. Silke, T. Tachikawa, M. Sano, T. Takayama, K. Ohtomo and T. Satoh 522
High-current positron beams in γ-defectoscopy
V.V. Gorev, K.O. Kachalov, V.I. Kleonsky and K.S. Serebrennikov 526
SIMS characterization of thin layers of IR and its silicides
J.M. Blanco, J.J. Serrano, J. Jiménez-Leube, T. Rodríguez, M. Aguilar and R. Gwilliam 530
The behaviour of Si and $CoSi_2$ during low energy nitrogen bombardment, with and without O_2-flooding
J. Deleu, B. Brijs, W. Storm, W. Vandervorst and W. De Coster 534

Author index 539
